How does an HMO work?

In an HMO you have a primary care provider (PCP) who is your health advocate and coach, providing care when you are sick and preventive care to keep you as healthy as you can be. When you need specialty care, your PCP will provide a referral. Referrals are not required to visit a gynecologist or obstetrician for routine, preventive, or urgent care; family planning services; outpatient and diversionary behavioral health services; physical therapy; occupational therapy; speech therapy; routine eye exam; and emergency services. Through your Value HMO coverage, you're always covered for urgent and emergency care no matter where you travel.
