Overview

Qinlock is a tyrosine kinase inhibitor indicated for treatment of advanced gastrointestinal stromal tumor (GIST) in adults who have previously received treatment with at least 3 kinase inhibitors, including imatinib

Coverage Guidelines

Authorization may be granted for members new to the plan who are currently receiving treatment with Qinlock, excluding when the product is obtained as samples or via manufacturer's patient assistance program

OR

Approval of Qinlock will be granted if the member meets all following criteria and documentation has been submitted:

1. The member is at least 18 years of age
2. The member has a diagnosis of gastrointestinal stromal tumor (GIST)
3. The prescriber is an oncologist or medication is being prescribed in consultation with an oncologist.
4. The member has previously received treatment with imatinib and at least 2 other kinase inhibitors

Limitations

1. Initial approvals and reauthorizations will be granted for 12 months
2. The following quantity limits apply:

Qinlock	90 tablets per 30 days
---------	------------------------
