Overview

Skyrizi is an interleukin (IL)-23 antagonist FDA indicated for moderate to severe plaque psoriasis, moderate to severe active Crohn's disease, and active psoriatic arthritis in adults. The inhibition of the interaction with the IL-23 receptor results in the inhibition of the of the release of proinflammatory cytokines and chemokines.

Coverage Guidelines

Authorization may be granted for members new to the plan who are currently receiving treatment with Skyrizi excluding when the product is obtained as samples or via manufacturer's patient assistance program

OR

Plaque psoriasis (PsO)

Authorization may be granted for members who meet ALL the following criteria and documentation has been submitted:

1. The member is at least 18 years of age
2. The member has diagnosis of moderate to severe plaque psoriasis
3. The member has at least 5% of body surface area (BSA) affected OR crucial body areas (e.g., hands, feet, face, neck, scalp, genitals/groin, intertriginous areas) are affected
4. The member meets ONE of the following:
 - a. Inadequate response or intolerance to TWO conventional therapies in any of the following combinations:
 - 1 topical agent + 1 systemic agent (methotrexate, cyclosporine or acitretin)
 - 1 topical agent + phototherapy
 - 1 systemic agent + phototherapy
 - 2 systemic agents

- b. The member has a clinical reason to avoid ALL conventional therapies. (See Appendix A)
- c. The member has severe psoriasis that warrants a biologic DMARD as first-line therapy

Psoriatic arthritis (PsA)

Authorization may be granted for members who meet ALL the following criteria and documentation has been submitted:

- 1. The member is at least 18 years of age
- 2. The member has diagnosis of active psoriatic arthritis
- 3. Member meets ONE of the following:
 - a. The member has had an intolerance or inadequate response (after at least 3 months of treatment) with methotrexate or leflunomide
 - b. The member has a contraindication to BOTH methotrexate and leflunomide AND has experienced an inadequate response, intolerance, or contraindication to sulfasalazine.

Crohn’s Disease (CD)

Authorization may be granted for members who meet ALL the following criteria and documentation has been submitted:

- 1. The member is at least 18 years of age
- 2. The member has diagnosis of active Crohn’s disease
- 3. The member has had an inadequate response, intolerance or contraindication to at least one conventional therapy option (see Appendix B).

Continuation of Therapy

Reauthorization approvals will be granted when documentation has been submitted supporting clinical improvement in member’s condition.

Limitations

- 1. Initial approvals will be granted for 24 months
- 2. Reauthorizations will be granted for 24 months
- 3. **For all indications**, member must have a pretreatment tuberculosis (TB) screening with a TB skin test or an interferon gamma release assay (e.g., QFT-GIT, T-SPOT.TB). *
 - a. Note: * Members who have received Skyrizi or any other biologic DMARD or targeted synthetic DMARD (e.g., Xeljanz) are exempt from all requirements related to TB screening in this Policy.
- 4. The following quantity limits apply:

Skyrizi 75mg and 150mg	<u>Psoriatic Arthritis/Plaque Psoriasis:</u> One loading dose: 150mg at weeks 0 and 4 Maintenance dose: 150mg every 12 weeks
Skyrizi IV 600mg/10mL and 360mg/2.4mL	<u>Crohn’s Disease:</u> IV Loading dose: 600mg at weeks 0, 4, and 8 Maintenance SQ: 360mg at week 12, and every 8 weeks after.

Appendix A

Examples of Clinical Reasons to Avoid Pharmacologic Treatment with Methotrexate, Cyclosporine or Acitretin.

- 1. Alcoholism, alcoholic liver disease or other chronic liver disease
- 2. Breastfeeding
- 3. Drug interaction
- 4. Cannot be used due to risk of treatment-related toxicity
- 5. Pregnancy or planning pregnancy (male or female)

6. Significant comorbidity prohibits use of systemic agents (examples include liver or kidney disease, blood dyscrasias, uncontrolled hypertension)

Appendix B: Examples of Conventional Therapy Options for CD

1. Mild to moderate disease – induction of remission:
 - a. Oral mesalamine
2. Mild to moderate disease – maintenance of remission:
 - a. Azathioprine, mercaptopurine
 - b. Alternatives: methotrexate intramuscularly (IM)
3. Moderate to severe disease – induction of remission:
 - a. Methotrexate IM
4. Moderate to severe disease – maintenance of remission:
 - b. Azathioprine, mercaptopurine
 - c. Alternative: methotrexate IM
5. Perianal and fistulizing disease – maintenance of remission:
 - d. Azathioprine, mercaptopurine
 - e. Alternative: methotrexate IM

Review History

11/20/2019 – Reviewed at P&T

07/22/2020 – Reviewed and Updated July P&T; Updated Program Type to PA and QL; added TB testing requirement under Limitations. Effective 10/01/2020.

03/16/2022 – Reviewed and Updated March P&T; Added new indication psoriatic arthritis; added severe psoriasis may warrant a biologic DMARD as first-line therapy. Effective 05/01/2022

09/21/2022 – Reviewed and Updated for Sept P&T; added new indication for Crohn’s disease. Effective 11/1/22

01/11/2023 – Reviewed for Jan P&T; updated ‘exceptions’ to allow new formulation of Skyrizi IV under the Medial Benefit only. Effective 2/1/2023
