Dosing Reference of Comparative Statin Potencies Available in Appendix

Mass General Brigham Health Plan will approve requests to exceed the quantity limit if the following conditions are met:

- The patient currently has a headache (acute migraine) or cluster headache and needs a one-time override.
- OR**
- The patient currently experiences 2 or more migraine headaches per week, takes medication for headache prophylaxis such as beta-blockers (propranolol, atenolol, metoprolol, etc.), tricyclic antidepressants (amitriptyline, etc.), calcium channel blockers (verapamil, etc.), anticonvulsants

(Depakote (divalproex), topiramate), etc.], provides documentation of therapy, and has greater than 6 attacks per month.

- If the patient has greater than 12 attacks per month, the patient must be followed by a headache specialist, neurologist, or had an appointment with a specialist within the past year for approval.

Limitations

1. Approvals for current headaches (acute migraine) or cluster headache are granted as a one-time-only override.
2. Long term approvals are granted for up to a maximum of 2 times the quantity limit per month for up to 12 months
