Overview

Enjaymo is indicated to decrease the need for red blood cell (RBC) transfusion due to hemolysis in adults with cold agglutinin disease (CAD).

Coverage Guidelines

Authorization may be reviewed for members new to the plan who are currently receiving treatment with requested medication excluding when the product is obtained as samples or via manufacturer's patient assistance programs.

OR

Authorization may be granted for members when all the following criteria are met, and documentation is provided:

1. Member has a diagnosis of primary cold agglutinin disease (CAD)
2. Prescribed by or in consultation with a hematologist
3. Documented history of at least one blood transfusion in previous six months before the initiation of treatment with Enjaymo

Continuation of Therapy

Reauthorization requires physician attestation there is no evidence of unacceptable toxicity or disease progression while on the current regimen (e.g., a reduction in blood transfusion)

Limitations

1. Initial approvals will be granted for 6 months
2. Reauthorizations will be granted for 12 months.

Review History

07/20/22 – Reviewed and created for July P&T. Effective 9/01/2022
