Coverage Guidelines

Authorization may be granted if the following drug specific criteria are met:

Mupirocin 2% cream

1. The Member has a diagnosis of impetigo **AND**
2. The Member has infected skin lesions due to susceptible strains of *Staphylococcus aureus* or *Streptococcus pyogenes* species **AND**
3. Patient experienced an inadequate response or intolerance to generic mupirocin ointment* for the current indication.

Bactroban (mupirocin) Nasal 2% Ointment[†]

1. The Member has a diagnosis is eradication of nasal colonization with *methicillin-resistant Staphylococcus aureus* (MRSA) **AND**
2. The Member experienced an inadequate response or intolerance to generic mupirocin ointment* for the current indication.

***Pharmacist's Notes:** mupirocin ointment is available without a prior authorization; however, mupirocin 2% cream and Bactroban Nasal ointment require a prior authorization.

[†]Although not FDA-approved for intranasal use, generic mupirocin ointment should be tried prior to the Bactroban nasal product. The mupirocin ointment contains PEG which can potentially cause a drying effect or stinging/irritation; the intranasal formulation is a non-PEG (paraffin-based) product.

Limitations

1. Approvals will be granted for a one-time fill within 7 days of authorization
