### Overview

Prescriptions that meet the initial step therapy requirements will adjudicate automatically at the point of sale. If the prescription does not meet the initial step therapy requirements, the prescription will deny with a message indicating that prior authorization (PA) is required. Refer to the criteria below and submit a PA request for the members who do not meet the initial step therapy requirements at the point of sale.

#### Initial Step-Therapy Requirements:

**First-Line:** Medications listed on first-line are covered without prior-authorization.

**Second-Line:** Second-line medications will pay if the member has filled at least ONE first-line medication or a second-line medication within the past 180 days.

### Coverage Guidelines

Authorization may be granted for members new to the plan within the last 90 days who are currently receiving treatment with a second-line agents excluding when the product is obtained as samples or via manufacturer's patient assistance programs

#### OR

If a member does not meet the initial step therapy requirements, then approval of a second-line medication will be granted if the member has had a documented inadequate response, side effect, or a contraindication to one first-line or one second-line medication.

FIRST-LINE	SECOND-LINE
Oxybutynin extended-release tablets Solifenacin tablets Tropium chloride extended-release capsules	Darifenacin extended-release tablets Fesoterodine extended-release tablet Mirabegron extended-release tablet Tolterodine extended-release capsules

### Limitations

- Approvals will be granted for 12 months
