Overview

Xeljanz/Xeljanz XR (tofacitinib) is a Janus kinase (JAK) inhibitor indicated for:

1. Moderately to severely active rheumatoid arthritis (RA)
2. Active psoriatic arthritis (PsA)
3. Moderately to severely active ulcerative colitis (UC)
4. Active polyarticular-course juvenile idiopathic arthritis (pcJIA)
5. Active Ankylosing Spondylitis

Coverage Guidelines

Authorization may be granted for members new to the plan within the past 90 days who are currently receiving treatment with the requested medication, excluding when the product is obtained as samples or via manufacturer's patient assistance programs

OR

Authorization may be granted when all the following diagnosis-specific criteria are met:

Moderately to severely active rheumatoid arthritis (RA) – Xeljanz/XR

1. Diagnosis of moderately to severely active rheumatoid arthritis (RA)
2. Member has minimum duration of a 3-month trial and failure, intolerance, or contraindication to ONE of the following conventional therapies at maximally tolerated doses:
 - a. Methotrexate
 - b. Leflunomide
 - c. Sulfasalazine
3. Member has had an inadequate response or intolerance to ONE or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

Active psoriatic arthritis (PsA) – Xeljanz/XR

1. Diagnosis of active psoriatic arthritis (PsA)
2. ONE of the following:
 - a. Actively inflamed joints
 - b. Dactylitis
 - c. Enthesitis
 - d. Axial disease
 - e. Active skin and/or nail involvement
3. Member has had an inadequate response or intolerance to ONE or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

Moderately to severely active ulcerative colitis (UC) – Xeljanz/XR

1. Diagnosis of moderately to severely active ulcerative colitis
2. ONE of the following:
 - a. Trial and failure, intolerance, or contraindication to ONE of the following conventional therapies:
 - i. 6-mercaptopurine
 - ii. Aminosalicylate (e.g., mesalamine, olsalazine, sulfasalazine)
 - iii. Azathioprine
 - iv. Corticosteroids (e.g., prednisone)
 - b. Disease severity warrants systemic biologic as first-line therapy
3. Member has had an inadequate response or intolerance to ONE or more TNF inhibitors (e.g., adalimumab, golimumab)

Active polyarticular-course juvenile idiopathic arthritis (pcJIA) - Xeljanz

1. Diagnosis of active polyarticular-course juvenile idiopathic arthritis (pcJIA)
2. Member has had an inadequate response or intolerance to one or more tumor necrosis factor (TNF) blockers (e.g., adalimumab, etanercept)
3. Minimum duration of a 6-week trial and failure, intolerance, or contraindication to ONE of the following conventional therapies at maximally tolerated doses:
 - a. Leflunomide
 - b. Methotrexate

Ankylosing spondylitis (AS) – Xeljanz/XR

1. Diagnosis of active ankylosing spondylitis
2. Member has minimal duration of 1-month trial and failure, contraindication, or intolerance to TWO different non-steroidal anti-inflammatory drugs (NSAIDs) at maximally tolerated doses.
3. Member has had an inadequate response or intolerance to ONE or more TNF inhibitors (e.g., adalimumab, certolizumab pegol, etanercept, golimumab)

Continuation of Therapy

Requests for reauthorization will be approved when the following criteria are met:

1. Documentation is submitted supporting improvement in member's condition as evidenced by low disease activity or improvement in signs and symptoms of the condition.

Limitations

1. Approvals will be granted for 24 months
2. The following quantity limits apply:

Drug Name and Dosage Form	Quantity Limitation
Xeljanz tablet	2 tablets per day
Xeljanz XR tablet	1 tablet per day
Xeljanz oral solution	240 mL per 30 days

Review History

06/24/2013 – Reviewed

02/24/2014 – Reviewed

02/23/2015 – Reviewed

02/22/2016 – Reviewed

02/27/2017 – Adopted SGM & PDS

02/26/2018 – Updated

06/25/2018 – Updated

11/20/2019 – Added Rinvoq as a trial for RA

03/18/2020 – Reviewed; Added Xeljanz XR to criteria (effective 6/1/20)

01/19/2022 – Reviewed and Updated; added new indication of active polyarticular-course juvenile idiopathic arthritis (pJIA); references updated.

03/16/2022 – Reviewed and updated for March P&T; Added Rinvoq and Skyrizi as preferred trial for PsA. Effective 05/01/2022

09/21/2022 – Reviewed and Updated for Sept P&T; Added criteria for active ankylosing spondylitis. Effective 11/1/22.

03/15/2023 – Reviewed and Updated for March P&T; updated Ulcerative Colitis contraindication criteria to add Rinvoq and Stelara to Humira. Effective 6/1/2023.

11/15/2023 – Reviewed and Updated for Nov P&T; updated criteria to be in line with FDA approved indication. Removed TB requirement. Added examples for each indication and updated conventional therapies. Effective 1/1/2024

10/09/2024 – Reviewed and updated at October P&T. Removed age requirements for ankylosing spondylitis and psJIA. Specified approvable formulations for each indication. Updated reauthorization criteria to require documentation of clinical response to treatment. Effective 1/1/2025.

05/14/2025 – Reviewed and updated for May P&T. Updated criteria for ulcerative colitis to remove disease characteristic requirement and allow for approval if disease severity warrants systemic biologic as first-line therapy. Updated initial approval length for ulcerative colitis to 24 months. Effective 07/01/2025.
