Overview

Xgeva (denosumab) is a monoclonal antibody approved for prevention of SREs in patients with bone metastases from solid tumors and multiple myeloma. Additionally, Xgeva (denosumab) is FDA approved for the treatment of adults and skeletally mature adolescents with giant cell tumor of bone that is unresectable or where surgical resection is likely to result in severe morbidity and for the treatment of hypercalcemia of malignancy refractory to bisphosphonate therapy.

Coverage Guidelines

If member is new to the plan (as evidenced by coverage effective date of less than or equal to 90 days), submission of medical records documenting that the member is currently receiving treatment with the requested drug, excluding when the product is obtained as samples or via manufacturer's patient assistance programs

OR

Authorization may be granted for members when all the following drug-specific criteria are met, and documentation is provided:

Prevention of skeletal-related events secondary to bone metastases in cancer related to solid tumors and in multiple myeloma;

Treatment of hypercalcemia of malignancy

ALL of the following:

1. Diagnosis is **ONE** of the following:

- a. Prevention of skeletal-related events secondary to bone metastases in cancer related to solid tumors
 - b. Prevention of skeletal-related events secondary to multiple myeloma
 - c. Treatment of hypercalcemia of malignancy
2. Prescriber is an oncologist, hematologist, or orthopedic specialist or has provided consult notes from an oncologist, hematologist, or orthopedic specialist
3. Dosing is appropriate per FDA labeling
4. For Aukelso (denosumab-kyqq), Bomynta (denosumab-bnht), Osenvelt (denosumab-bmwo), Wyost (denosumab-bbdz), or Xgeva (denosumab), clinical rationale for use of the requested agent instead of Bilprevda (denosumab-nxxp) and Xtrenbo (denosumab-qbde)

Treatment of Giant Cell Tumor of the bone (GCTB)

ALL of the following:

1. Diagnosis of giant cell tumor of the bone (GCTB)
2. **ONE** of the following:
 - a. The tumor or metastases are unresectable
 - b. Surgical resection is likely to result in severe morbidity
 - c. Surgery is not an option at this time
3. Dosing is appropriate per FDA labeling
4. For Aukelso (denosumab-kyqq), Bomynta (denosumab-bnht), Osenvelt (denosumab-bmwo), Wyost (denosumab-bbdz), or Xgeva (denosumab), clinical rationale for use of the requested agent instead of Bilprevda (denosumab-nxxp) and Xtrenbo (denosumab-qbde)

Continuation of Therapy

ONE of the following:

1. Resubmission by prescriber will infer positive response to therapy
2. **BOTH** of the following:
 - a. Member is stabilized on Bilprevda and Xtrenbo
 - b. Submission of medical records documenting that member is still at high risk for fracture or clinical picture suggesting high risk for fracture
3. **ALL** of the following:
 - a. Member is stabilized on Xgeva or another denosumab biosimilar (except Bilprevda and Xtrenbo)
 - b. Submission of medical records documenting that member is still at high risk for fracture or clinical picture suggesting high risk for fracture
 - c. Clinical rationale for use of the requested agent instead of Bilprevda (denosumab-nxxp) and Xtrenbo (denosumab-qbde)

Limitations

1. Authorizations will be granted for 1 year.

Review History

06/22/2022: Created and Reviewed June P&T, switched from CVS Standard to Custom criteria, updated approval duration for Prolia to 24 months; combined Prolia & Xgeva to single document. Effective 09/01/2022.

03/15/23 - Reviewed and updated for Mar P&T. Matched MH UPPL criteria. Effective 4/1/23.

12/11/24 – Reviewed and updated for P&T. Formatting updates. Effective 01/06/25

7/9/25 – Policy separated and created for P&T. No clinical changes made. Formatting updates. Effective 8/11/25

10/8/25 – Reviewed and updated for P&T. Added Xgeva biosimilars (Wyost, Osenvelt, Bomynta) to criteria. Effective 11/17/25

04/15/26 – Reviewed and updated for P&T. Added Xgeva biosimilars (Bilprevda, Xtrenbo) to policy. Xtrenbo was added as a step through for Xgeva and its biosimilars. Effective 5/11/26

9/9/26 – Reviewed and updated for P&T. Added Aukelso to criteria requiring PA through PB and MB. Bilprevda and Xtrenbo will become preferred. Updated reauth criteria to reflect MH's stability criteria. Effective 10/1/26
