Overview

Simponi Aria (golimumab) is a tumor necrosis factor (TNF) inhibitor indicated for treatment of:

- Adult patients with moderately to severely active rheumatoid arthritis in combination with methotrexate
- Active psoriatic arthritis in patients 2 years of age and older
- Adult patients with active ankylosing spondylitis
- Active polyarticular juvenile idiopathic arthritis (pJIA) in patients 2 years of age and older

Coverage Guidelines

Authorization may be granted for members new to the plan within the past 90 days who are currently receiving treatment with the requested medication, excluding when the product is obtained as samples or via manufacturer's patient assistance programs

OR

Authorization may be granted for members who meet all the following diagnosis-specific criteria:

Moderately to severely active rheumatoid arthritis (RA)

1. Diagnosis of moderately to severely active rheumatoid arthritis (RA)
2. Member has minimum duration of a 3-month trial and failure, intolerance, or contraindication to ONE of the following conventional therapies at maximally tolerated doses:
 - a. Methotrexate
 - b. Leflunomide
 - c. Sulfasalazine

Active psoriatic arthritis (PsA)

1. Diagnosis of active psoriatic arthritis (PsA)
2. The member meets ONE of the following:
 - a. Actively inflamed joints
 - b. Dactylitis
 - c. Enthesitis
 - d. Axial disease
 - e. Active skin and/or nail involvement

Active ankylosing spondylitis (AS)

1. Diagnosis of active ankylosing spondylitis
2. Member has minimum duration of 1-month trial and failure, contraindication, or intolerance to TWO different non-steroidal anti-inflammatory drugs (NSAIDs) at maximally tolerated doses.

Polyarticular Juvenile Idiopathic Arthritis (pJIA)

1. Diagnosis of active polyarticular juvenile idiopathic arthritis (pJIA)
2. Member has a minimal duration of a 6-week trial and failure, intolerance, or contraindication to ONE of the following conventional therapies at maximally tolerated doses:
 - a. Leflunomide
 - b. Methotrexate

Continuation of Therapy

Requests for reauthorizations for all diagnoses will be granted when the following criteria are met:

1. Documentation is submitted supporting improvement in member's condition as evidenced by low disease activity or improvement in signs and symptoms of the condition.

Limitations

1. Initial approvals and reauthorizations will be granted for 24 months
2. The following quantity limits apply:

Drug Name	Quantity Limit
Simponi Aria	4 vials per 8 weeks
