Overview

Spevigo (spesolimab-sbzo) is an interleukin-36 receptor antagonist indicated for the treatment of generalized pustular psoriasis (GPP) in adults and pediatric patients 12 years of age and older and weighing at least 40 kilograms.

The subcutaneous formulation is approved for the treatment of GPP when not experiencing a flare.

Coverage Guidelines

If member is new to the plan (as evidenced by coverage effective date of less than or equal to 90 days), submission of medical records documenting that the member is currently receiving treatment with the requested drug, excluding when the product is obtained as samples or via manufacturer's patient assistance programs

OR

Authorization may be granted for members when all of the following criteria are met:

1. Diagnosis of generalized pustular psoriasis (GPP)
2. Generalized Pustular Psoriasis Physician Global Assessment (GPPGA) total score of 0 or 1
3. ONE of the following:
 - a. Member is 18 years of age or older
 - b. BOTH of the following:
 - i. Member is 12 to 17 years of age
 - ii. Member weighs at least 40 kilograms
4. Requested medication is prescribed by or in consultation with a dermatology specialist
5. Member is NOT experiencing a flare of GPP

Continuation of Therapy

Reauthorization may be granted when all of the following criteria are met:

1. Submission of medical records (e.g., chart notes) documenting an improvement in the member's condition, as evidenced by low disease activity or improvement in signs and symptoms of the condition

Limitations

1. Initial approvals and reauthorizations will be granted for 12 months

- The following quantity limitations apply on the pharmacy benefit:

Drug Name and Dosage Form	Quantity Limitations
Spevigo SC 150 mg/mL prefilled syringe	4 syringes per 28 days
Spevigo SC 300 mg/2 mL prefilled syringe	1 syringe per 28 days

Review History

01/11/2023 – Created and Reviewed for January P&T. Effective 03/01/2023

08/14/2024 – Reviewed for August P&T. Added Spevigo SC to the policy for treatment of GPP. Updated criteria for Spevigo IV. Updated approvable age for Spevigo IV to 12 years of age and added minimum weight of 40 kg to align with updated FDA package labeling. Differentiated diagnosis requirements for GPP vs for GPP flare. Removed IL36RN, CARD14, and AP1S3 gene mutations from criteria. Updated Spevigo IV reauthorization criteria to require documentation that an additional dose for GPP flare is required. Removed TB screening requirement. Clarified step therapy language to indicate member must be new to the plan within the past 90 days. Effective 11/1/2024.

10/08/2025 - Reviewed at October P&T. Updated policy to reflect that it only applies to the SC formulation. Removed the IV from the policy. Updated policy to indicate it no longer applies to the medical benefit. Effective 01/01/2026.

07/15/2026 – Reviewed and updated at July P&T. Updating initial criteria to specify that minimum weight requirement applies to members 12 to 17 years of age. Updating reauthorization criteria to require submission of medical records (e.g., chart notes) documenting an improvement in the member's condition, as evidenced by low disease activity or improvement in signs and symptoms of the condition. Updating quantity limits in the Limitations section of the policy. Effective 10/01/2026.
