Overview

Cimzia (certolizumab) is a tumor necrosis factor (TNF) blocker indicated for:

- Reducing signs and symptoms of Crohn’s disease and maintaining clinical response in adult patients with moderately to severely active disease who have had an inadequate response to conventional therapy
- Treatment of adults with moderately to severely active rheumatoid arthritis
- Treatment of adult patients with active psoriatic arthritis
- Treatment of adults with active ankylosing spondylitis
- Treatment of adults with non-radiographic axial spondyloarthritis (nr-axSpA)
- Treatment of adults with moderate to severe plaque psoriasis (PsO)

Coverage Guidelines

Authorization may be reviewed on a case by case basis for members new to the plan currently receiving treatment with Cimzia, excluding when the product is obtained as samples or via manufacturer’s patient assistance programs

OR

Authorization may be granted if the member meets ALL following criteria and documentation has been submitted

Moderate to severe rheumatoid arthritis

Prescriber provides documentation of **ALL** of the following:

1. Diagnosis of moderate to severe rheumatoid arthritis
2. **ONE** of the following:
 - a. Paid claims or physician documented inadequate response or adverse reaction to **ONE**

- traditional DMARD (See Appendix B) or contraindication to traditional DMARDs
- b. Paid claims or physician documented inadequate response or adverse reaction to **ONE** biologic DMARD that is FDA-approved for the requested indication
- 3. Dosing is appropriate
- 4. Prescriber provides clinical rationale for use of Cimzia over Humira or Enbrel (e.g., member is pregnant, breastfeeding or planning to become pregnant)

Psoriatic arthritis (PsA)

Prescriber provides documentation of **ALL** of the following:

- 1. Diagnosis of psoriatic arthritis
- 2. Appropriate dosing
- 3. Prescriber provides clinical rationale for use of Cimzia over Humira or Enbrel (e.g., member is pregnant, breastfeeding or planning to become pregnant)

Ankylosing spondylitis

Prescriber provides documentation of **ALL** of the following:

- 1. Diagnosis of ankylosing spondylitis
- 2. Paid claims or physician documented inadequate response or adverse reaction to **TWO** NSAIDs or contraindication to **ALL** NSAIDs
- 3. Appropriate dosing (see appendix A)
- 4. Prescriber provides clinical rationale for use of Cimzia over Humira or Enbrel (e.g., member is pregnant, breastfeeding or planning to become pregnant)

Non-radiographic axial spondyloarthritis

Prescriber provides documentation of **ALL** of the following:

- 1. Diagnosis of non-radiographic axial spondyloarthritis
- 2. Paid claims or physician documented inadequate response or adverse reaction to **TWO** NSAIDs or contraindication to **ALL** NSAIDs
- 3. Appropriate dosing (see appendix A)

Moderate to severe plaque psoriasis

Prescriber provides documentation of **ALL** of the following:

- 1. Diagnosis of moderate to severe plaque psoriasis
- 2. **ONE** of the following:
 - a. Paid claims or physician documented inadequate response or adverse reaction to **ONE** conventional therapy or contraindication to **ALL** conventional therapies (see appendix B)
 - i. topical agent
 - ii. phototherapy
 - iii. systemic agent
 - b. Paid claims or physician documented inadequate response or adverse reaction to **ONE** biologic DMARD that is FDA-approved for plaque psoriasis
- 3. Appropriate dosing
- 4. Prescriber provides clinical rationale for use of Cimzia over Humira or Enbrel (e.g., member is pregnant, breastfeeding or planning to become pregnant)

Moderate to severe Crohn's disease

Prescriber provides documentation of **ALL** of the following:

- 1. Diagnosis of moderate to severe Crohn's disease

2. Appropriate dosing
3. Prescriber provides clinical rationale for use of Cimzia over Humira (e.g., member is pregnant, breastfeeding or planning to become pregnant)
4. **For a diagnosis of fistulizing Crohn's disease**, an inadequate response, adverse reaction or contraindication to Avsola® (infliximab-axxq), Remicade® (infliximab), Inflectra® (infliximab-dyyb) or Renflexis® (infliximab-abda) should be documented.

New members currently stable on Cimzia® can be approved without documentation of failed trials with the conventional therapies if they have a documented history of hospitalization for one of the above immune conditions.

Continuation of Therapy

Reauthorization requires physician documentation of continuation of therapy and positive response to therapy.

Limitations

1. Initial approvals will be granted for:
 - a. Plaque Psoriasis: 3 months
 - b. All other diagnosis: 6 months
2. Reauthorizations will be for 12 months.
3. The following quantity limits apply:

Cimzia Prefill Syringe Kit	2 kits (4 syringes) per 28 days
Cimzia Starter Kit	6 syringes per 28 days

Appendix A

Dosing	
Cimzia® (certolizumab pegol)	<p>Crohn's disease: <u>Initial:</u> 400 mg SQ (as 2 SQ injections of 200 mg) once and then repeat at weeks 2 and 4, then every 4 weeks</p> <p>Ankylosing spondylitis, psoriatic arthritis, rheumatoid arthritis (moderate-severe), non-radiographic axial spondyloarthritis (nr-axSpA) & moderate to severe plaque psoriasis (PsO): <u>Initial:</u> 400 mg SQ (as 2 SQ injections of 200 mg) once and then repeat at weeks 2 and 4</p> <p><u>Maintenance:</u> 200 mg SQ once every 2 weeks or 400 mg (as 2 SQ injections of 200 mg) every 4 weeks</p>

Appendix B. Conventional Therapies for Plaque Psoriasis

Conventional Treatment Lines	Agents Used
Topical Agents	emollients, keratolytics, corticosteroids, coal tar, anthralin, calcipotriene, tazarotene, calcitriol, calcineurin inhibitors
Systemic Agents	Traditional DMARDs: methotrexate, apremilast, acitretin,
Phototherapy	ultraviolet A and topical psoralens (topical PUVA), ultraviolet A and oral psoralens (systemic PUVA), narrow band UV-B (NUVB)

- 01/05/2009 – Effective
- 02/22/2010 – Reviewed
- 02/28/2011 – Reviewed
- 02/27/2012 – Reviewed
- 02/25/2013 – Reviewed
- 02/24/2014 – Reviewed and revised
- 02/23/2015 – Reviewed and revised
- 02/22/2016 – Reviewed
- 02/27/2017 – Reviewed and revised (adopted SGM & Step) in P&T Meeting
- 11/20/2017 – Reviewed and revised (adopted MH RS)
- 02/20/2019 – Reviewed in P&T Meeting
- 03/18/2020 – Review and Updated P&T Mtg (removed inadequate response to Enbrel AND Humira to match MH) (effective 6/1/20)

11/05/2020 – Reviewed and Updated; separated out Comm/Exch vs. MassHealth. Matched MassHealth Preferred Unified Formulary for implementation 1/1/2021

01/11/2023 – Reviewed and updated for Jan P&T. Matched MH criteria. Appropriate diagnosis was replaced with a specific indication throughout. Added a noted in all indications to bypass required biologic trials if a provider documents that Cimzia is preferred because the member is pregnant, breastfeeding or planning to become pregnant. Removed clinical rationale for use of Cimzia over Humira or Enbrel for non-axial radiographic axial spondyloarthritis. Added criteria requiring a trial of Avsola, Remicade, Inflectra, or Renflexis for fistulizing Crohn’s disease. Effective 3/1/23.
