**Overview**

Hyaluronic Acid Derivatives are used in the treatment of pain in osteoarthritis (OA) of the knee in patients who have failed nonpharmacologic treatment and conventional analgesics

**Coverage Guidelines**

Members may be approved for a Hyaluronic Acid Derivative if ALL the following criteria has been met and documentation has been provided:

1. The Member has a documented diagnosis of Kellgren-Lawrence Scale (Grade 2 or greater) osteoarthritis of the knee confirmed by radiology or documentation of moderate or severe degenerative arthritis
2. Confirmation that the member’s OA or DJD is prohibitive and preventing the member from participating in daily activities.
3. The prescribing physician is a rheumatologist, orthopedic or sports medicine specialist or physiatrist
4. Member has trialed AND had an inadequate response or intolerance with or has a contraindication to ALL the following treatment options:
  - All conservative analgesics: acetaminophen, oral non-steroidal anti-inflammatory agents (NSAIDS) taken for at least 30 days (continuous) OR topical NSAIDs, if member cannot tolerate oral NSAIDs
  - Member has received intra-articular corticosteroid injections which resulted in less than 8 weeks of clinical response.

- Non-pharmacologic (e.g. exercise, weight loss, physical therapy -date required)
5. Requests for **Durolane, Euflexxa, Gelsyn-3, GenVisc 850, Hyalgan, Hymovis, Monovisc, Orthovisc, Synjoynt, Supartz FX, Synvisc, Synvisc One, Triluron or TriVisc**: Documented adequate therapeutic trial and experienced treatment failure with Gel-One AND Visco-3

### Continuation of Therapy

Reauthorizations will be granted when all of the following conditions have been met:

- Physician documentation is submitted confirming significant improvement (at least 50%) in pain and function of the knee
- Authorization for additional courses of treatment will be given no sooner than 6 months apart for any HAD product.
- Reauthorization is limited to one treatment course.
- For additional courses beyond 12 months, clinical notes must indicate sustained clinical effectiveness and clinical inappropriateness of a total knee replacement.

### Limitations

1. Initial approvals will be granted for 2 months with the following quantity limits:

<b>Drug</b>	<b>Dosing Schedule</b>	<b># of injections</b>
<b>Gel-One, Durolane</b>	3mL once	One injection
Euflexxa, Gelsyn-3, Synvisc, Triluron, Synjoynt	2mL weekly for 3 weeks	3 injections
<b>Visco-3, TriVisc</b>	2.5 mL once a week for 3 weeks	3 injections
GenVisc 805, Supartz FX	2.5 mL once weekly for 5 weeks	5 injections
Hyalgan	2 mL once weekly for 5 weeks	5 injections
Hymovis	3 mL once weekly for 2 weeks	2 injections
Monovisc	4 mL once	One injection
Orthovisc	2 mL once weekly for 3 to 4 weeks	3 to 4 injections
Synvisc-One	6 mL once	one injection

**Bolded** medications are AllWays Health Partners Preferred HAD products

2. Reauthorizations will be granted for one single treatment courses.
3. The plan does not cover hyaluronic acid derivatives for the treatment of osteoarthritis in locations other than the knee because it is considered experimental, investigational, or unproven.
4. The plan does not cover hyaluronic acid derivatives for the treatment of isolated patella femoral arthritis or patella femoral syndrome as this is considered experimental, investigational, or unproven

### **Review History**

06/19/2019 – Reviewed

05/20/2020 – Reviewed May P&T Mtg; References updated; added all medications to ‘Limitations’

7/22/2020 – Updated July P&T Mtg; added Triluron to criteria. Effective 8/1/20

07/21/2021- Added Kellgren scale requirement, added additional reauth criteria; added coverage restriction of diagnosis of isolated patella femoral arthritis or patella femoral syndrome as this is considered experimental, investigational or unproven; approval time to 2 months. Effective 10/01/2021.

03/16/2022 – Reviewed and Updated for March P&T; Administrative update to include preferred products into criteria. No clinical change.

09/21/2022 – Reviewed at Sept P&T; Separated Comm/Exch vs MH policy; no clinical updates
