Overview

Uptravi® (selexipag) is indicated for the treatment of pulmonary arterial hypertension (PAH, WHO Group I) to delay disease progression and reduce the risk of hospitalization for PAH.

Drug Class	Drug	Mechanism(s) of Action	NYHA Class Indication	Route of Administration
Prostacyclin receptor agonist	Uptravi® (selexipag)	(1) Direct vasodilation of pulmonary and systemic arterial vascular beds, and (2) Inhibition of platelet aggregation	II to III	IV or PO

Coverage Guidelines

Authorization may be reviewed on a case by case basis for members who are new to the plan currently receiving treatment with requested medication excluding when the product is obtained as samples or via manufacturer's patient assistance programs.

OR

Authorization may be granted for members when all the following criteria are met, and documentation is provided:

1. Diagnosis of PAH
2. Prescriber is a pulmonologist or cardiologist, or consult notes from a pulmonologist or cardiologist are provided regarding the diagnosis
3. Twice daily dosing was prescribed
4. If the request is for Uptravi® (selexipag) vial, **BOTH** of the following:

- a. Member is stabilized on Uptravi® (selexipag) tablets
- b. Member is temporarily unable to take oral medications

Continuation of Therapy

Reauthorization requires physician documentation of continuation of therapy for members who are experiencing benefit from therapy as evidenced by disease stability or disease improvement.

Limitations

- 1. Initial approvals and reauthorizations will be granted for 12 months.
- 2. The following quantity limits apply:

Uptravi oral tablets	60 tablets per 30 days
