Overview

Ameluz, in combination with photodynamic therapy (PDT) using BF-RhodoLED or RhodoLED XL lamp, a narrowband, red light illumination source, is indicated for lesion-directed and field-directed treatment of actinic keratoses (AKs) of mild-to-moderate severity on the face and scalp.

Levulan for topical solution plus blue light illumination using the BLU-U Blue Light Photodynamic Therapy Illuminator is indicated for the treatment of minimally to moderately thick actinic keratoses of the face, scalp, or upper extremities.

Coverage Guidelines

Authorization may be reviewed on a case by case basis for members who are new to the plan currently receiving treatment with requested medication excluding when the product is obtained as samples or via manufacturer's patient assistance programs.

OR

Authorization may be granted for members when all the following criteria are met:

Ameluz (aminolevulinic acid)

1. Diagnosis of mild to moderate actinic keratosis on face and/or scalp
2. Member is \geq 18 years of age
3. Prescriber is a dermatologist or consult notes from a dermatologist are provided
4. Inadequate response or adverse reaction to **ONE** or contraindication to **ALL** of the following:
 - a. topical fluorouracil
 - b. topical imiquimod
 - c. cryosurgery
5. Requested agent will be used in conjunction with photodynamic therapy
6. Inadequate response, adverse reaction, or contraindication to Levulan used in conjunction with photodynamic therapy

Levulan (aminolevulinic acid)

1. Diagnosis of mild to moderate actinic keratosis on face, scalp, and/or upper extremities

2. Member is \geq 18 years of age
3. Prescriber is a dermatologist or consult notes from a dermatologist are provided
4. Inadequate response or adverse reaction to **ONE** or contraindication to **ALL** of the following:
 - a. topical fluorouracil
 - b. topical imiquimod
 - c. cryosurgery
5. Requested agent will be used in conjunction with photodynamic therapy

Continuation of Therapy

New flares of diagnosis must meet initial criteria.

Continuation of same episodes: Prescriber provides documentation of medical necessity (lesions have not completely resolved) for use beyond 12 weeks (3 months) for AK.

Limitations

1. Initial approvals and reauthorizations will be granted up to 12 weeks (3 months).
